Practice Guidelines For Family Nurse Practitioners, 4e

Synopsis

Prepare for FNP practice with the latest evidence-based guidelines! Practice Guidelines for Family Nurse Practitioners, 4th Edition provides essential information on current assessment and management protocols for primary care patients of all ages. Key details are easy to find, with the book's concise, outline-style guidelines and abundant summary tables and charts. And you'll be ready to manage care more effectively with the latest information on topics such as pain management, bariatric surgery follow-up, restless legs syndrome, and new medications for diabetes and cardiovascular disorders. Written by expert nurse practitioners Karen Fenstermacher and Barbara Toni Hudson, this guide equips you for the conditions most commonly seen in primary care settings. Essential, evidence-based guidelines provide the latest guidance for management of disorders commonly seen by FNPs in primary care settings, including information on which problems must be referred to a physician and which constitute an emergency. Quick-reference tables and charts include pediatric conditions charts, comparative charts for similar disorders, and health maintenance guidelines charts. Coverage of special populations assessment provides quick access to information on adult, pediatric, and geriatric assessment. Compact size and spiral binding make this guide easy to carry and easy to use in the clinical setting. Full-color insert provides an illustrated, quick reference to common skin disorders. Concise outline format makes it easy to locate essential information quickly. NEW! Treatment guidelines include the latest nationally recognized evidence-based treatment guidelines, including those for dementia, asthma, and diabetes. UPDATED content throughout includes bariatric surgery follow-up after release from surgical care, assessment of pelvic masses, restless legs syndrome, the advanced eye examination including advanced staining techniques, and new medications for diabetes and cardiovascular disorders. NEW Pain chapter provides guidelines on pain management and caring for patients with pain. NEW Laboratory and Diagnostic Pearls chapter offers useful laboratory and diagnostic tips that the authors have accumulated over years of clinical practice. NEW! Coverage of respiratory and ENT disorders is presented into two separate chapters, reflecting how these problems are actually handled in clinical practice. NEW user-friendly design includes an improved outline format, easier-to-read tables, and color highlighting for essential information.

Customer Reviews

This is a very helpful and concise go to book. I use this in daily practice and I have been in practice for about 4 years, it almost flow like a SOAP note, signs symptoms HPI, what to look for and what assessment and plan is. I would recommend this book, only 4 stars because I think that with as much as I use it it showed wear pretty quickly.

I love this guideline book. It covers so much and I can quickly find topics that I need help with. I love the tables and chart summaries. I highly recommend this book. It is good for students and new nurse practitioners.

I wish I had this book for my Health Assessment class rather than the required textbook - this is much more helpful and in a nicer format. It helps break down the assessment for writing SOAP notes as well. This book should be on every FNP student's shelf.

Love love love this! I had a few books I have purchased to help me in the clinic setting. I do both primary care and urgent care and I am a new grad NP. This book has been a lifesaver and I use it frequently. I take it every where I go - it is easy to navigate and is very organized. Highly recommend!

100% satisfied! I would buy this product again.

This is a GREAT resource! I saw this on a Youtube video and they had mentioned that this would be perfect for school use. I can't even count how many times I have referenced this and used this in my

studies!

Excellent

This is a really good resource for my nurse practitioner clinicals. I recommend to all of my classmates.
