Customer Reviews

I have been looking for great cook books for a long time that allowed me to eat healthy food while giving me options. I found so many new recipes in this book. I like this book as it contains a lot of recipes I can actually follow and make on my own. This book offers good, versatile and simple food and no hassle. It's got simple step by step process on how to use the particular rice cooker and help make particular dishes about it. Each of the guidance inside textbooks are generally simple to comprehend and helpful approach to learn. Recipe books like these are what enable us to put into practice what we think about on a daily basis, and I must say that it is nice to have somewhere to turn to when it comes to helping my family eat healthy. Still, Aroma Rice Cooker Meals is somewhat limited. Most of the recipes it contains are focused on Cajun-style dishes. For those sensitive to how spicy their foods are, there is plenty of room to accommodate mild to wild tastes. Moreover, the Cajun-style focus is not as limiting as it might first appear since many of the recipes are rice or pasta-based, insuring that they work well with the rice cooker. The ultimate test of a good rice cooker cookbook, of course, is getting compliments and raves about the food. Every time I've made a recipe from this book, the food has been devoured quickly. We rarely have leftovers and my son's friends even make a point of looking in the kitchen to see if the rice cooker is turned on. This book is extremely well organized and easy to understand and follow. The shopping section at the end with internet sources to purchase usual rice cooker accessories, spices, and vegetables is excellent. I am recommending Aroma rice cookers highly, and in the same breath, I make sure to recommend this book.

These are the most ridiculous recipes. Who uses quail eggs and amaranth or knows where to buy them? I thought it was going to show some basic recipes for our new Aroma rice cooker but there was not one I wanted to try and cook. Julienned chicken thigh anyone? I would return it but not worth the postage and effort.

This cookbook thoroughly discusses the advantages and the benefits of the aroma rice cooker

machine and provides 50 different recipes that it is capable of cooking. I am amazed of the versatility of this machine which can cook not only rice-based recipes but also other dishes as well such as couscous, oats, polenta, soups, stews, sweets & desserts, etc. It also cooks a perfect pot of rice in the most convenient, time-saving and safe way possible. This made me consider switching my ordinary rice cooker pot with this aroma rice cooker machine should the budget permits.

It sounded so good but we found it did not come close to giving us "comfort food " recipe's that we really wanted so it was a major disappointment.

I love to cook and I'm working in Indian Restaurant - I thought that I know everything about rice cooking (we use tasty basmati rice) but I was wrong. Since I am using Aroma Rice Cooker I have better rice in my home than we have in my workplace! In this book you can learn how to get perfect rice, but not only rice - this book will guide you how to cook eggs, fruits, meat and more. My favorite dish from this book is creamy chicken with mushrooms and rice. Very nice read!

Well-cooked plain rice is guaranteed using this aroma rice cooker but the author doesn't only want to limit it to that so he put up with these 50 top rated aroma rice cooker recipes that you can choose from to make each meal more tasty and delicious every time. Find the right combination with your rice, use your aroma rice cooker and share it with the whole family. Now that's perfect!

The Aroma Rice Cooker is a versatile machine, which can cook numerous dishes or full course meals in a healthy, but efficient fashion. Many are of course, rice-based but you can also use this kitchen appliance for other cooking edible grains such as couscous, oats, polenta, etc.

I bought this for ideas on one pot cooking in my truck. I instantly regretted it. Vegan recipes and strange ingredients.. Banana skins.. Really?! I apparently need to write my own cookbook for the Aroma cooker.
