Customer Reviews

Laura King did her undergraduate work at Kenyon College, where, an English major, she declared a second major, in psychology, during the second semester of her junior year. She completed her A.B. in English with high honors and distinction and in psychology with distinction in 1986. Laura then did graduate work at Michigan State University and the University of California, Davis, receiving her Ph.D. in personality psychology in 1991. Laura began her career at Southern Methodist University in Dallas, moving to the University of Missouri, Columbia, in 2001, where she is now a professor. In addition to seminars in the development of character, social psychology, and personality psychology, she has taught undergraduate lecture courses in introductory psychology, introduction to personality psychology, and social psychology. At SMU, she received six different teaching awards, including the "Manning Award for Sustained Excellence" in 1999. At the University of Missouri, she received the Chancellor's Award for Outstanding Research and Creative Activity in 2004. Her research, which has been funded by the National

Institutes for Mental Health, has focused on a variety of topics relevant to the question of what it is that makes for a good life. She has studied goals, life stories, happiness, well-being, and meaning in life. In general, her work reflects an enduring interest in studying what is good and healthy in people. In 2001, her research accomplishments were recognized by a Templeton Prize in positive psychology. Laura's research (often in collaboration with undergraduate and graduate students) has been published in the Journal of Personality and Social Psychology, Personality and Social Psychology Bulletin, Cognition and Emotion, the Journal of Personality, and other publications. A new paper on the place of regrets in maturity is forthcoming in the American Psychologist. Currently editor-in-chief of the Journal of Research in Personality, Laura has also served as associate editor of Personality and Social Psychology Bulletin and the Journal of Personality and Social Psychology, as well as on numerous grant panels. She has edited or co-edited special sections of the Journal of Personality and the American Psychologist. In "real life," Laura is an accomplished cook and enjoys listening to music (mostly jazz vocalists and singer-songwriters), gardening, and chasing Sam, her 3-year-old son.

I purchased this for my daughter who was taking her first class in college. she said the book was useful and directly correlated to the information taught in the class. The professor used the book as a resource for independent extended reading and homework assignments. My daughter earned an "A" for the class.

It's great that this book is cheaper than the hardcover if you need to save money, but I'll never buy a loose leaf text again. The pages are so thin and fragile and they easily tear out of the binder I put them in. Other than that, the book came in perfect condition and is very helpful for my psychology class.

Textbook, what more can be said. Nephew didn't complain about book nor did he complain about getting it sent to him for free lol

It is doing well for my psychology class. No complaints.

The book arrived quickly and was exactly as described. I was pleasantly surprised to see that it was in shrink wrap as well. The only problem I had was that my mail lady (who I have had many problems with, and does not affect my experience with the seller at all) shoved it into my mail box,

so I would recommend to always request, for any seller, do write in very large letters "textbook - do not bend". Other than that, I am very pleased. Great price for a brand new book! Also, I'm not sure why everyone on here is complaining that this was loose leaf - it said so in the description, and I couldn't find a non-loose leaf version online anyway. Also, I don't know why people are complaining that the CD/code didn't come with it - I've always had to buy the CD separately, unless I bought the textbook brand new from my college's bookstore, and last time I did that it was \$245 - so \$90 for the book and \$100 for the code is a steal!

Excellent. Brand New and less than half the cost from the campus bookstore. Did not come with an access code, but I did not need it for my particular class.

Great book and great way to learn. I did not like the loose-lead package would prefer with normal book binding

Nice price very thin paper though
