A Korean History For International Readers: What Do Koreans Talk About Their Own History And Culture?

Synopsis

This book is a historical text that covers Korean history from its foundation to the modern era. It especially deals with pre-modern societies of Korea in detail. Despite its long history, life in its society and its culture are rarely spoken of outside the peninsula. Rather than arranging the historical events chronologically, this book focuses more on the details of the historical events by questioning how the diverse experiences that Koreans had affected their life and culture and what influences that culture had on constructing Korean history. This is the reason why we publish this book, although there are already numerous books that introduced Korean history. Readers could realize what Koreans have endured and how it led to their position in the world today. It also mentions their moral values and what they believe is right or wrong.

The Association of Korean History TeachersThis association was launched in 1988 by history teachers for the purpose of providing students with a lively history education based on accurate historical perspectives and visualization of the past. Currently there are about 2,000 members who are actively working for this organization throughout the country, and we have been developing teaching materials in specialization of regional, Korean, East-Asian, and World history in accordance to individual subject curricula. Furthermore, we show concern in other educational methods such as the Internet, photos, videos, and field trips as well as theorizations. Based upon our accomplishments, we endeavor to make history a part of public knowledge while publishing History Education, a quarterly magazine specializing in history education in Korea. We have published the following list of books ever since: Our History in view of art (1992); Our History in view

of Historical Materials I.II (1994); Korea through the Ages I.II (2002); How Should We Teach History to Our Children? (2002); Lively World History Textbook I.II (2005); Mutually Facing Korean and Japanese History I.II (2006); History, What Should We Teach and How? (2008); Living as a History Teacher (2008); Delighted Korean History for Elementary Schools, 1~10 (2010).

As a Korean American with little knowledge of Korean history I found this book very good - it kept me interested and the illustrations are great. This is not a translation. Yes, the writing could be better but it is not bad - I don't understand the other comment saying that this book is unreadable, far from it.

This book is accessible to general readers; is filled with creative maps and pictures. Most importantly, it is written by a group of dedicated history teachers, and thus engages us in with very interesting and intelligent questions. It is written from the perspective of Korean people for the non-Korean readers and provides us with a unique angle to lesser known histories of a lesser known nation.

I bought this in a bookstore, wanting a good overview in English of Korean history. The illustrations are great but the translation is awful. Unreadable.
