Zoologist Jim Kavanagh has made a career out of introducing novices to plants, animals, the sciences and world cultures. In addition to creating over 500 simplified nature guides, he has also

authored guides to languages, cities and outdoor skills. An avid traveler and backpacker, Kavanagh's path has taken him around the world to many remote destinations including the upper , Africa, Australia, and the Arctic Circle (and this is just the As). He is also the author of a series of state-specific guides to common species and natural attractions and a children's book on evolution.

This is great for a quick reference. We keep it next to the back door so we can spot new birds. We've purchased multiple guides similar (trees, birds, etc from multiple states we've lived in). Same quality, and my wife is now looking forward to seeing even more birds that she didn't know were in the area!
