# Hearing (Five Senses Series)

## Synopsis

Do you remember your first realization of any of your five senses? Prolific children's author J. M. Parramâ n successfully tackles these tough concepts in words that 3-5 year olds can comprehend. These five colorful books awaken young minds to the wonders of the senses: the taste of oranges, the aroma of fresh-baked bread, and other sensations that give us delight in being alive. Educational, yet fun to read, this clever series is clearly written and cheerfully illustrated in flowing colors throughout. Each book includes a special "scientific" section to help parents answer their children's questions about the senses.

## Book Information

Series: Five Senses Series

Paperback: 32 pages

Publisher: Barron's Educational Series (April 30, 1985)

Language: English

Grade Level: Preschool - 3

## Customer Reviews

Text: English, Spanish (translation)

Sharon Gordon is the author of several nonfiction books for children. --This text refers to an out of print or unavailable edition of this title.

The many strengths of the book include:~the My Five Senses chart ( beginning of the book) which can be used creatively to teach/reinforce many instructional concepts;~the organization of the book, first introducing each of the senses..then giving real live examples which connect children to the

senses.. going next to ideas that broaden one's understanding of the senses..ending with how the main purpose of all the senses~ the illustrations which beautifully bring the text alive and awakens knowledge and understanding.a beautiful book. Thank you.

I used this series of books with a daycare class. The kids loved them. The pictures are engaging, and the text is a fun way to introduce children to the senses. Each book contains further pictures and explanations about the mechanics of the body, i.e. the nose, ears, tongue, which are great for children who are still curious when the book is done.

arrived quickly and as described!

I love this series of 5 books. A must have for any preschool teacher who uses the 5 senses theme. Nice illustrations and short easy text.

The Five Senses - Hearing, is one of five in a series by Maria Rius, J.M. Parramon and J.J. Puig which were first published in 1985 and offer information that is rather timeless. With this work, and the others in the series, you sort of get more than you paid for in that not only do you receive a wonderful little book to introduce the little ones to the sense of hearing, but you also receive a fine little beginning reader along with some wonderful art work that should and will stimulate other senses in addition to hearing. The art work in this little book has an earlier European flavor to it that is charming in everyway, from color selection to execution of the various characters. The text consists of short declarative sentences such as "Listen to the bells ringing. Listen to the children singing...And the sound of music." The text goes perfectly with the illustrations. The authors and illustrators have included a wonderful anatomically correct illustration of both the outer and inner ear and all of their parts along with an explanation for the adult reader to use in furthering the discussion on this particular sense. This is a fine teaching tool and the children love it. It is best used as a discussion helper, but it certainly doubles as a read along book as well. It would be difficult to find anything to criticize concerning this particular work and I do highly recommend it. It may be getting up there in years, but the information here is good and quite workable. Don Blankenship The Ozarks

This series is great for teaching about the senses and good practice in reading for emergent readers.

Teach about the senses using this series, especially if they are emergent readers.
