Grade Level: 4 and up

Customer Reviews

A Complete Book for Astronomy & Space

I actually purchased this book for myself, but my 3-year old son is so interested in the stars and planets, we read it together. I love Usborne books because they are well-written and straight to the point. The illustrations and photos are beautiful and packed full of information. I especially appreciate the pages devoted to types of telescopes and binoculars as we research what to buy. This book is complete with star charts. A fantastic, simplified, all-in-one for the beginning astronomer.

Great book! Has amazing photos and wonderful information!

This book is a great addition to any child who loves space! Great photos and layouts! A very good book.
