Quantum Faith™

Synopsis

How does quantum physics relate to the Bible? Can words move mountains? How did Jesus supersede the laws of physics? There are amazing similarities between the teachings of Jesus and the discoveries of the new physics, quantum theory. The concept of speaking to mountains and trees may not be religious metaphor, but laws of a new physics that have not been fully understood. Jesus taught that our words are powerful enough to move physical matter. Quantum physics has discovered that subatomic particles respond to the observer. In this book, you will discover that your words and your faith (beliefs) are unseen forces that affect everything in your world. You are the one giving substance to your world through words!

Inspirational

Customer Reviews

This little book has inspired me to look further into the Quantum realm of things. I have always been interested, but never really had a reason to do so. This information has given me that reason.

Annette Capps is definitely following in the footsteps of her father, Charles Capps. The teaching that

is found in his/her books are quite inspiring and spot on! He also has other books and a radio program called "Concepts of Faith" where you can learn about different "concepts" concerning the Scriptures. It is an awesome way to approach the Scriptures for study. This is a small book (32 pages), but I feel that it is just a starter as Annette continues her study on this subject.

I expected a little more from this book. I wanted a clearer understanding of quantum physics but this just didn't do it. Like a previous reviewer stated, good start for an immature Christian but not for mature.

This little book is power packed. Made lights go off all over my head! I went back and bought several more to give to friends. Annette is a gifted writer like her Dad, Charles Capps.

As a born again believer I had always thought that science was almost always in conflict with the foundations of my core beliefs. But after reading this wonderful little book it challenged me to learn all that I could about the strange world of quantum physics. I learned about the weird actions of the electron. How the electron that orbits the nucleus is not always in particle form. But at times exists in an invisible wave like state (like a cloud, everywhere at once) until the very act of observation causes this invisible matter to blink into existence in a particle form. Some of the questions that Annette brought out were the same questions that I had. How does the electron know that some one is looking at it, and why does it react somewhat differently for each observer? Was it responding according to what the scientist believes? This really shook me to my core, and a verse in Hebrews chapter 11 verse 1 was brought to my mind. Now faith is the substance of things hoped for, the evidence of things not seen. Verse 3 also says that through faith we understand that the worlds were framed by the word of God, so that things which are seen were not made of things which do appear. Could we perhaps be talking about a very part of the spiritual realm? Perhaps the very act of speaking and declaring the Word of God bring into manifestation the signs and miracles that we so desperately need in this day and time. The more I studied this invisible world of quantum physics I found no roadblocks to hinder my faith but only more reasons to believe in the existence of an almighty God more magnificent and wonderful than I had henceforth dared to believe. A word of caution however. Our enemy (Satan) is still using the same tactics that he used on Eve in the Garden of Eden. In Genesis chapter 3 verse 5 while trying to get her to eat of the tree of the knowledge of good and evil, he told Eve For God does know that in the day ye eat thereof, then your eyes shall be opened, and ye shall be as gods, knowing good and evil. there are some

individuals who take a portion of the truth found in quantum physics and run with it in all kinds of different directions, with some even claiming that we can become our own gods. In fact this is the only issue that I have with Annette book is the 2 books that she recommends for more study. I feel a better choice would be titles by John Polkinghorne, Bernard Haisch, Henry F Schaefer, Gerald L Schroeder, or a book soon to be published called Elsewhen by David Van Koevering. In closing However I highly recommend this book by Annette Capps.

If you are a believer the first few pages, unless you already know this, will blow your mind. I am learning that as I speaketh so it happens. This even takes it into scientific terms that align God's truth with science.

Eye opening and life changing for me and my husband! So much so that I am giving it to my massage clients to help them renew their thinking!

Annette Capps like her whom like her father I admired greatly. He was the first minister I heard talk about speaking to things and circumstances and they will obey you. I am so glad that Annette chose to delve into quantum physics so that it scientific proof of how we as Jesus can do what He did because he knew the laws of quantum physics which where we as He can use our quantum faith to make impossible possible by using God's word.

But the insights in this book require meditation. The "precepts" you believe actually guide your perception. Let the Holy Spirit bbring you to the rhema (the scripture He had for you in this moment), engage your imagination to see what you're creating as clearly as possible, then speak it again and again until you feel in your spirit that it's enough. Bless your angels to help. And finally, give thanks until the time you see it. It works for me.
