The birds, the bees, the flowers and the... TREES! How do trees grow? Why do leaves change? What kind of tree is that? The acclaimed Brooklyn Botanic Garden’s guide answers all kids’ (and their parents’) tree-related questions in an easy-to-understand way. It features 33 different trees that grow in North America, from rural Georgia to the streets of New York City to the California suburbs. Each profile includes a beautiful botanical watercolor illustration by author Gina Ingoglia showing the tree as it appears in a particular season, as well as life-size depictions of its leaf, flower, and seed. Readers of all ages will be in awe over the wonderful world of trees.

Great book with easily understood text. We all enjoyed it!

Great book. My 5-year-old son loves it and I’ve learned quite a bit, too, that I didn’t learn (or didn’t remember...) from my college biology classes!

A gift for my granddaughter, by request from her mama. This has been on my daughter’s wish list, and they have been using it every day since receiving it. All 3 granddaughters love it and are learning to identify trees.
I bought this for my 1 year old grandchild so she can begin learning about nature. I actually have learned a bunch for this great book.

Got this as a gift for my stepdaughter so we could use it outside. She really likes it!

Each page describes a tree in a story-book form that is entertaining for children to read or listen as their parents read to them. The illustrations are fun as well as educational. It’s a delightful book.

It was a gift for a 5 year old. He loves this book 😊

Beautiful Illustrations and a fun book to read with children. I just wished there was more information on the specific trees themselves.
