ANTIGRAVITY PROPULSION: Human Or Alien Technologies? (The Underground Knowledge Series Book 2)

Synopsis

The biggest mystery of our era finally gets the balanced and unbiased investigation it deserves. **ANTIGRAVITY PROPULSION: Human or Alien Technologies?** is a far-reaching exploration into the UFO phenomenon that covers all possible scenarios and discounts nothing. Written by novelists, filmmakers and independent researchers James Morcan & Lance Morcan, with a foreword by advanced interstellar propulsion systems expert Grant Hayman and an afterword by leading scientist and space industry veteran Dr. Takaaki Musha, one of the great enigmas of all time is examined with equal doses of open-mindedness and skepticism. This book includes never-before-mentioned accounts of popular UFO topics like Area 51, Roswell and alien abduction claims, as well as tackling less reported subjects such as Nazi and Japanese antigravity experiments and even rarer theories involving quantum physics and lost civilizations of the ancients. What do all the sightings of UFOs around the world reveal? Who is covering up the existence of these strange craft in our skies? And are the technologies manmade or extraterrestrial in origin? Forget what you think you already know and be prepared to be surprised. For those searching for the truth about these exotic technologies and wanting to know why they are being concealed from the public, **ANTIGRAVITY PROPULSION** is a must read.

Was an interesting book. I think the basic premise that this technology exists is highly probable and even proven. The idea of a splinter or break away civilization leaves me deeply concerned that for most of us trapped on an increasingly polluted planet, there will be no miracles or enlightenment or even survival unless we challenge those who control the flow of information and this technology. They will not give it up easily. The evolution of government and corporate liaisons that are basically functioning outside of the structure of law and on our meal ticket needs to come to an end. If this remains unchanged it will eventually, in all probability, cost the majority of humans alive on this planet their lives. I suspect this will become a critical issue for the generation now being born and a widespread terminal. event for the generation thereafter. Disclosure now could dramatically alter this vision of the future and see our family of humanity here on planet earth spread peacefully to the stars.

Your book covers much needed information for future fixes to our planet of education pool to correct the problems we have created. It is food for thought and widens our possibilities. I enjoyed reading the book well worth the time to consume it.

I liked it. There was a lot in it that I knew about, but there were many things I didn't. I particularly liked how the author presented the information without passing judgement, so the reader wasn't baited one of the other. Nicely done. A quick, interesting read.

It's about time that someone told the truth about the visitors. I wish that they could help us with things that are going on here on earth. Our government officials are liars and they would not know the truth if it was standing in front of them. Such people we have to represent us. The whole thing is disgusting. What douch'ebags.

The book is a nice companion book to others I have read recently. It's always helpful to evaluate obscure information from different angles for comparison and this book was indeed helpful. There are other more in depth (read BLACK) volumes out there to be sure, but also a more challenging read in most cases. A decent read, check it out...

Its about theories of antigravity. Who is flying these ships, ancients, aliens from another star, or some genius who developed was so brilliant they could change the world. By decides or more by their idea and technology. This book give us many theories of them. And who might have developed them.

Superb overview of information that steers clear of the disinformation channelsthat we have all grown used to reading. Solid stuff here and it shows that thisfather and son writing team have been pretty careful of their sources.I enjoyed it immensely.

The author offers different theories regarding the subject and leaves it up to the reader to decide.
