Joseph Cannizzaro, MD, has practiced pediatric medicine for thirty years with specialties in holistic integrative pediatrics, nutrition, and preventative medicine. The founder and managing pediatrician for the Pediatricians Care Unit and the Accordo Health Institute in Longwood, Florida, Dr. Cannizzaro received his MD from the University of Bologna Medical School in Bologna, Italy. As a US Army captain he served as the medical laboratory officer and cadet instructor at the United States Military Academy at West Point, New York. He lives in Florida with his wife and three sons.

If you have a general concept of how the body works, then this book should be an ok read for you. There are some more complicated sections where the author goes into great detail about the various bodily functions and it can get confusing. He does try to give you a glossary type reference on these pages though which is both helpful and clever. For this complicated subject matter, I think he does a pretty good job at making it understandable for the average person. There is some repetition throughout the book where I felt like he was making the same point over and over again. Overall, I think reading it added value to my overall understanding of these four epidemics. Be prepared though to read it in small portions in order to best digest the information.

Was hoping it would have some recipes- it doesn't. But it DOES have great lists on what the child CAN eat, (very short list) and what the child CANNOT eat. Very, Very, Very long list, of everything she's BEEN eating- ckn nuggets, mac and cheese, yogurt... Wish i'd known about this before she LOVED those exact foods, or rather before I let her get hooked on these toxins!! Very important read.

I have read a lot on the subject of ADD & ADHD and this has been the best.

Great info on children's nutrition!

Met all expectations! Thank you!

Great book, excellent condition!

The 4-A epidemic makes sense to a parent who has a child/teen with any combination of these epidemic factors. The food industry has gone awry, and our kids have paid for it. Children/teens who have a diagnosis of autism, ADHD, asthma and/or allergies all share one thing is common - food and water. This book explains how the gut is a holding tank for many of the symptoms that these kids experience. It has a good reference section for more research if one is so inclined. It is good information to add to the library of a parent or caregiver who manages a 4-A kid.

great book.
