Pediatric Education For Prehospital Professionals (PEPP), Second Edition

Synopsis

Pediatric Education for Prehospital Professionals (PEPP) represents a comprehensive source of prehospital medical information for the emergency care of infants and children. PEPP is designed to give prehospital professionals the education, skills, and confidence they need to effectively treat pediatric patients. Developed by the American Academy of Pediatrics, PEPP specifically teaches prehospital professionals how to better assess and manage ill or injured children. PEPP combines complete medical content with dynamic features and an interactive course to better prepare prehospital professionals for the field. The one-day BLS course is geared towards First Responders and EMT-Basics, while the two-day ALS course is for EMT-Intermediate and Paramedic providers.

Customer Reviews

Dr. Steven P. Shelov, M.D., M.S., F.A.A.P. is Professor of Pediatrics at Mount Sinai School of Medicine and Chairman of Pediatrics at Maimonides Medical Center and Lutheran Medical Center and Vice President of the Infants' and Childrens' Hospital of Brooklyn. He is the Editor-in-Chief of several of the parent publications for the AAP including "Caring For Your Baby" and "Young Child, The First Year Of Life," and "A Guide to Child Symptoms," Dr. Shelov pioneered and developed these series of books. In 2002, Dr. Shelov was presented with the Lifetime Achievement in Education Award by the American Academy of Pediatrics, its singular highest award for pediatric education. The American Academy of Pediatrics is an organization of 57,000 primary care pediatricians, pediatric medical subspecialists, and pediatric specialists dedicated to the health,

safety, and well-being of infants, children, adolescents, and young adults. AAP books with Bantam include "Caring for Your Baby" and "Young Child Birth to Five," "Caring for Your School-Age Child Ages 5 to 12," "Caring for Your Teenager", "Guide to Toilet Training," and "New Mother's Guide to Breastfeeding," --This text refers to the Hardcover edition.

It's good reading, didn't need it for the class considering the modules were adequate. This may be attributed to the lecture portion of my Medic class for peds aside from this resource, but it's still good information and a worthwhile cert.

It worked great for class. and although the book we needed was a newer edition this had all the critical information necessary and made my experience better

Very helpful. Excellent review.

Great

Approximately a week after ordering my book I received a large package in the mail. It was a book on stamps and not the book I ordered. I sent email to the seller who responded promptly the following day. The seller apologized for the mistake, but then proceeded to say that they no longer have that book in stock. In order for me to receive any refund I had to ship the wrong book back to them. I understand that there will be mistakes in a business. But it would of been nice if I could of been compensated for the aggravation of 1. Not receiving the book i needed for an upcoming class 2. Having to spend time standing in line at the post office to get the wrong book sent back for a refund. It would of been nice if they had at least offered me a discount for a another book of my choosing. They did say if I wanted the stamp book I could have it for 30% off the price....I don't need a stamp book! I haven't received a bank statement yet, but have never received any word that I have been reimbursed. Will NEVER use that seller again
