Numbers 0-25 Flash Cards

Synopsis

Numbers 0-25 Flash Cards can help your child learn numbers, counting, addition, and subtraction. Each card presents a number and either the number word or a set of colorful pictures representing the number. The Parent Card suggests activities to help your child learn numbers, addition, and subtraction.

Grade Level: Preschool and up

Customer Reviews

I bought these educational cards for my 1 year old, so we could start working on our words, numbers and colors. He absolutely loved them! We spent a lot of time looking at the cards and picking out our favorite ones.. He even liked them so much he started to eat the corners on a few of the cards! :)I look forward to buying more of these flash card sets as he gets older. Such a fun learning activity for him!

These work great in my preschool class. I send them home with a few other activities for optional weekend work. They are durable and have lasted two years amongst 40 students!

I wasn't sure if my son would be on board with flashcards, but he really likes these. He is still learning to recognize the numbers, but I was able to teach him the concept of addition in 15 minutes. Now I can't stop him from writing equations. He loves it! The pictures are very helpful when

a child is learning to recognize the number - if they get it wrong or struggle, you can just turn the card over and they count. It takes away their frustration of not knowing the answer and allows them to figure it out for themselves.

My 3 year old is in love with these! She doesn't count higher than 10 at the moment but we are learning. SO long as I can't live find where she hides some of these cards from me haha

I like the size of the cards - they aren't too big or small. My 2.5 years old daughter loves them!

I really needed a new set of number cards for my daycare, after searching for a similar set I had, I finally found this set. I really enjoy how sturdy and easy to hold this set is. When we are doing fast counting it is easy to slide a card from the front to back. They do not stick which is really nice too. The kids really like that there is a picture to go with the number and have fun counting how many of that picture there is. The numbers and words are very easy to read.

These r great cards. Never too early to have them in the house. My 30 month old can at least SAY 1 to 25. Quality is as expected. I just put them away when she reaches her limit as all start to fly around.

I've used numbers flash cards with my children when they were just babies. They enjoyed it over time. It was my way to entertain them. Both children are grown up now and doing well. The number cards are for my first granddaughter. Thank you.
